- › Diamond pattern reduce bending and twisting metal end caps keep the concrete out and protect the ends

Description: Paving screed kit 2 x 5 x 10ft with adjustable leveling c/w 3 x 6ft poles.

**GF10305****BULL FLOAT KITS**

Bull float kit come in handy when the area is too large to use a darby but not large enough for a channel float. The ideal application for bull floats is for finishing areas of concrete such as driveways, patios, walkways and sidewalks.

Description: Bull float kit 48", round end c/w 4 x 6ft poles.

**GF10320****CHANNEL FLOAT KITS**

Channel float kit best suited for larger areas of concrete such as large driveways, warehouse floors and roads. Channel floats have higher side channels compared to bull floats which create stability and can handle the excess concrete being pushed resulting in more flat and level the floor.

Description: Channel float kit 10ft c/w 4 x 6ft poles.
