

CIMAR JIELI manual sweeper is a new sweeping machine for easy cleaning. The dust is swept and collected into dirt hopper with the aid of the main broom and two front side brushes. The compact machine body is constructed of durable, corrosion-free impact resistant engineering plastic for high quality. It offers outstanding sweeping performance by utilizing roller brush to pull in fine dust and can be used in warehouses, plants, township roads, pavements, parking lots, fuel stations, cement mills etc.
